HWF

Your Animal's Health is Our Concern

Organic

Cardiovascular Detox for Canines

HWF may help support normal cardiovascular function by detoxing foreign contaminants left by environmental stressors. HWF supports:

- ❖ Normal circulation of the body process
- ❖ Normal purification of foreign substances

The Cardiovascular System

The heart is the center of the cardiovascular system pumping the blood that flows through the body. The blood supplies oxygen and other nutrients to the cells and picks up waste products to be disposed of.

Having a healthy cardiovascular system is key to a healthy life.

Our pets are so precious to us, we naturally want what's best for them. As they progress in life sometimes they acquire environmental contaminants that can accumulate in the cardiovascular system making the body work harder to eliminate them.

When a dogs body works harder to eliminate normal everyday toxins or contaminants the body can go under stress causing more issues to arise.

HWF has a natural blend of carefully selected herbs that provides a natural way of helping your dog maintain optimum health by supporting normal daily functions of the cardiovascular system, and assisting the body by synergistically working with the organs to detox unwanted contaminants.

HWF

HWF is made from the finest Non-GMO premium organic ingredients available. HWF comes in a 4 oz or 16 oz bottle. Each comes with a 5 ml/cc syringe and instructions.

HWF should not be used with these Amber Technology products: Kochi Free, Life Cell Support, Paxxin, TempaNerv, Tossa K, UTR, Vibactra and Vibactra Plus.

Directions For Use

WEIGHT	ml/cc	# OF SERVINGS PER 4 OZ BOTTLE
