

## TESTIMONIAL

*"The vet gave my cat two days to live due to FIP. I contacted Amber Technology and they overnighted the products I needed. I started him on the products as soon as they arrived and my cat was up and running within one week."*

Ben Benell, CA

### INGREDIENTS:

#### CAT'S CLAW

Has been known to tone, balance, and strengthen all body functions. Cat's claw has a compound known as carboxyl alkyl esters and has been documented with immunostimulant (stimulates the immune system), anti-inflammatory, anticancerous, and cell-repairing properties.

#### MACELA

Helps fight against viral and bacterial infections, it's great for use on respiratory problems caused by bacterial and viral infections, has strong antioxidant properties and increases the flow of bile from the gallbladder to help protect against liver damage and to lower liver enzymes levels.

#### ETHYL ALCOHOL

Intensifies, while preserving the properties of this herbal tincture.

#### FILTERED WATER

**Adizone™** – Demonstrated to reduce inflammation.\*

**Adizone C™** – Demonstrated to reduce inflammation in Cats.\*

**Derma Nerv™** – Relief from mental fatigue, poor memory, and nerve pain, aids in nervous tension, insomnia, thyroid disorders and itching; helps build nerves.\*

**Hawthorn & Dandelion™** – Supports and strengthens the heart muscle, improves circulation and may be used as a diuretic.\*

**Internal Gold Detox Kit™** – A whole body detox and rejuvenating kit.\*

**Kennel Koff™** – An antimicrobial designed to help animals overcome upper-respiratory ailments.\*

**Kidney Rejuvenator™** – Helps support normal kidney functions.\*

**Kitty Distempaid™** – Formulated to promote normalization of the digestive tract functions in the face of diarrhea, vomiting, gas, cramps and other intestinal dysfunctions.\*

**Kocci Free™** – An antiparasitic designed to help your pet overcome microscopic parasites.\*

**\*Life Cell Support™** – Supports the body's natural process of detoxification.

**\*Numo Care™** – Formulated to promote normalization of lung and upper respiratory functions.

**\*Otagia Drops™** – Ear drops for use in the reduction & elimination of ear inflammation, to include tenderness.

**\*Parvaid™** – Formulated to promote normalization of the digestive tract functions and other intestinal dysfunctions.

**\*Pet's Cough & Cold™** – Helps in the reduction of cough associated with bronchopulmonary nasal & sinus disorders.

**\*Pet's Pain Formula™** – Helps reduce inflammation, body aches, fever and motion sickness.

**\*Tummy Trouble™** – Promotes the normalization of digestive tract functions.

**\*TYD™** – Normalizes the thyroid gland.

**\*Urinary Tract Relief™** – Designed to support the body's normal urinary tract functions to include the associated discomforts.

**\*Vaccination & Wormer Detox™** – Helps promote the body's natural cleansing mechanisms to clear post-vaccination & wormer responses.

**\*Vibactra™** – A formula designed to enhance immunity through natural antibiotic and antioxidant activities.

**\*Vibactra Plus™** – A special combination of herbs demonstrated to enhance immunity through natural antibiotic, antioxidant and microscopic parasitical activities.

**Care Kits** – Contains products specially formulated to help your pet overcome illnesses they may encounter. These kits include immunity enhancements to give added protection as well as reduce free radicals which are both important for optimum health.

# Peritan FP™

Nutraceuticals For Pets

## ORGANIC

*\*An anti-inflammatory, immune stimulant, antiviral, detoxifier used to help your pet with viral infections, liver disorders, respiratory, pain, and arthritis.*

Peritan FP™ is an all natural herbal product designed to help with Feline Infectious Peritonitis (FIP) in cats. FIP is a worldwide viral disease of cats that can affect many systems of the body. It is a progressive disease and almost always fatal.

## Feline Infectious Peritonitis (FIP)

### HOW IS THE VIRUS TRANSMITTED?

Cats can be infected with feline coronavirus (FCoV) which can turn into Feline Infectious Peritonitis (FIP). FCoV can be found in the saliva and feces of infected cats. Therefore, cat-to-cat contact and exposure to feces in litter boxes are the most common modes of infection. Contaminated food or water dishes, bedding, and personal clothing may also serve as sources of infection.

### WHICH CATS ARE MORE LIKELY TO DEVELOP FIP?

Cats most likely to develop FIP are those with the weakest immune systems. This includes kittens, cats infected with feline leukemia virus, and older cats.

### WHAT ARE THE CLINICAL SIGNS OF DISEASE?

FIP is separated into two forms, wet and dry. There is a gradient between the two forms, and we may often see signs of both forms in a pet.

### DRY FORM

Dry FIP comes on more slowly. Nonspecific signs such as chronic weight loss, fever, loss of appetite and lethargy appear. Other signs occur depending on which organs are damaged by the Granulomas. Ten to twenty-five percent of cats will have neurological signs. When Granulomas occur in the central nervous system we see paralysis, disorientation, loss of balance, tremors, convulsions, behavior changes and urinary incontinence. The liver and kidneys are often affected. Granulomas can occur in the chest, as well. Sometimes the eye is the only organ affected. The pupil may appear irregular and the eye may appear discolored because of the inflammation that is present. Some cats with the dry form can live up to a year after first showing clinical signs.

### WET FORM

Early in the disease we can see similar signs to the dry form including weight loss, fever, loss of appetite, and lethargy. Anemia with resultant pale mucous membranes (e.g., gums) is often seen. Constipation and diarrhea can also occur. The wet form of the disease progresses rapidly and soon the cat may appear pot-bellied in appearance because of the fluid accumulation in the abdomen. Generally, the cat shows no signs of abdominal pain. Fluid may also accumulate in the chest causing respiratory difficulties. Most cats with the wet form of FIP die within two months of showing signs of disease.

## AMBER TECHNOLOGY'S PERITAN FP™

The active ingredients in Peritan FP™ are Macela and Cats Claw. Together they stimulate immune cells to help fight viral and bacterial infections. They help to protect the liver from toxins- and reduce inflammation. Macela may also stimulate bile production and digestion which helps your pets appetite.

During FIP your cats body can develop Granulomas. Granulomas form when the immune system attempts to wall off substances that it perceives as foreign but is unable to eliminate. Depending on the symptoms your cat is having from the Granulomas, there are other Amber Technology® products used along with Peritan FP™ that may help your cat eliminate the symptoms and be able to feel better.

Vibactra Plus™	Helps stimulate circulation, inner ear such as disorientation & loss of balance, also helps with tremors and convulsions.
Life Cell Support™	Helps with paralysis (loss of muscle function), fluid accumulation in the abdomen, plus it will help dissolve Granulomas.
Derma NERV™	Helps with the nervous system, paralysis (loss of muscle function), tremors, convulsions, and urinary incontinence. We also recommend Lethicin to help strengthen and repair nerves. (This can be found in most stores that sell supplements.)
Kidney Rejuvenator™	Helps straighten the kidneys.
Urinary Tract Relief™	Helps with urinary issues.
Kitty Distempaid™	Use for diarrhea associated with FIP

## SUGGESTED USE FOR PERITAN FP™

**Do not exceed the recommended dose!**

Shake product well before use.

General Use: Administer orally 4 times per day for up to 10 days. If symptoms continue give 5 day break and start administering orally 4 times per day for another 10 days. Keep using this cycle until symptoms stop.

FIP Use: Administer Peritan FP™ orally 4 times per day as needed. Continue use up to 3 days after symptoms have stopped.

<u>Weight</u>	<u>Drops</u>	<u>ml/cc</u>	<u>Times daily</u>
Under 3 lbs	2	0.06	4
3-10 lbs	5	0.15	4
11-25 lbs	10	0.3	4
26-80 lbs	13	0.39	4
81-150 lbs	15	0.45	4
151-250 lbs	20	0.6	4

Caution: DO NOT USE WITH BAYTRIL OR TAMIFLU. Do not give Peritan FP™ to cats or dogs with diabetes; the ingredient Macela will lower blood sugar. Do not use Peritan FP™ while breeding, may cause sterilization while using this product. As with any food product, herbs can antagonize allergies in your pet. Stop giving Peritan FP if you see any of the following: Rash, hives, edema (swelling), diarrhea, or blood in stools. If your pet has a reaction give charcoal and take to a veterinarian. (Have your vet treat for symptoms.) May cause miscarriage in some animals.
